- Nginx, GIT, Docker
- Opencart, Symfony, Doctrine

Education

National Aerospace University "KHAU"

Telecommunications and radio engineering.
2017 - 2021

Work Experience

🏠 Freelance

Now

🏠 Small price (one time project)

Full Stack Developer | December 2024 - November 2025

Created a centralized dashboard to replace manual spreadsheets and provide real-time marketing insights.

- Eliminated manual work with automated performance calculations
- Connected entire marketing stack (ads, e-commerce, CRM, finance)
- Provided executive-ready reports with automated expense tracking

🏠 Corefy

Backend Developer | May 2023 - July 2023

Contributed to a payment orchestration platform.

- Integrated payment provider connectors
- Resolved bugs and implemented logic patches using ELK stack for log analysis
- Improved system stability by troubleshooting issues reported through Sentry

🏠 Stellium (Local Web Studio)

Full Stack Developer | July 2020 - April 2023 (~2 years 10 months)

Full-cycle web development with focus on e-commerce and business systems.

- E-commerce development on OpenCart: performance optimization, SEO, client features
- CRM system development with Symfony 5 and React/TypeScript
- Speed optimization (caching, asset compression, SQL tuning)
- REST API development and system integrations
